**The Easter Bunny stopped by here early and left us a surprise.....
Trifexis, the 3 in 1 pill!**

A New “*Super Drug*”
Kills and prevents fleas, prevents Heartworms, and treats and controls 3 intestinal parasites. All of this in a beef flavored chewable tablet, given once a month. Safe for dogs 8 weeks of age and older (and 5 lbs and greater). Ideal for families with children and other pets, since there is no transfer of the product through contact, people who want to avoid mess and inconvenience and those of us who have dogs who love to swim or are bathed frequently. It’s great for those dogs that have dermatological (skin) conditions. With this 3 in 1, easy to administer chewable tablet, there is no need to isolate your pet, just treat and play!
An environmentally friendly product.

Saturday, April 16th the SPCA is having a Peace-March inspired 12th Annual K9-3K dog walk.

This is to raise money for homeless pets. The walk starts at 11am. Their goal is \$225,000.00 and so far they have raised \$100,510.97. They will have live music, vendors and contests to enter. Check out the Wake County SPCA website for more information.

Animal Trivia:

A dog was the first animal in space.

How many rows of whiskers does a cat have?

4 rows

Most cats in Halifax (Nova Scotia) have 6 toes.

Dogs and cats are either right or left pawed.

The butterfly was originally known as a “flutterby”.

Record shows there are more dogs in Paris than people.

Did you know that a pig also needs sunscreen just like us?
“Howard”
